**07881 945 793**

Is your computer broken or running slow?  
Can't get your head around a program or device?  
ISP unhelpful in supporting your chosen system?  
Want a custom-built PC without the high street price?

TS Technology can offer solutions to all your problems:

- **Repairs**
- **Upgrades & Peripherals**
- **Health & Security Checks**
- **Support & Advice**
- **Open Source Software**

Highly Skilled – With over 10 years experience in various IT environments, I have all the skills you will need to get the most out of your computer or network.

Independent – No ties to any hardware manufacturer or software retailer, meaning you get totally impartial advice for whatever you choose to run.

Competitive Pricing – Standard Callout is £15\*, which includes a 30 minute diagnostic, after which an estimate can be provided based on an hourly rate of £25, charged in half hours. If the problem is fixed within the first 30 minutes £15 is all you pay, and for 4 or more hours callout will not be charged.

\*For the Middlesbrough/Stockton/Thornaby area, a small fuel charge may apply beyond this area.

Ubuntu is a fully featured operating system with all the software you need, including web browser, email client, full office suite, image gallery and editing.

Best of all, these features are free and there is a wealth of other free software available to download.

Some of these programs are also available for windows, download them and see what Open Source software has to offer.
